

TEACHER PERFORMANCE ASSESSMENT

1. Complete the Classroom Field Experience Data form (Task A-1) to analyze your classroom context. After completion of the context description, use the collected data to write one of your portfolio reflections. Include quantitative data.
2. Complete the Unit Overview and Assessment Plan Table for a unit of study taught during your student teaching experience.
3. Prepare an instructional sequence (three KTIP lesson plans [Task A-2] that are taught in sequential order). You should teach one of the lessons in the instructional sequence. Record one of the lessons.
4. Analyze the collected student assessment data. The Analysis of Student Work (Task C) and Reflection template should be used for one assessment used in the unit. At least four copies of student work demonstrating your assessment (using a scoring guide that you constructed) should be included with this analysis.
5. Complete the Student Teaching Professional Growth Plan after the midterm conference with your supervising teacher and college supervisor(s).
